Dr. Ahsan M. Bhatti, M.D., F.A.C.P., is one of Minnesota's most experienced gastroenterologists, with 20-plus years of experience in advanced endoscopic procedures.

DR. AHSAN M. BHATTI, M.D., F.A.C.P., opened Bhatti Gastroenterology (GI) in 2015 to provide first-class GI care without the wait and to support the mission of delivering care that achieves the highest quality, safety, patient satisfaction, and affordability levels. He expanded and opened Bhatti Surgery Center in 2018. Today, Bhatti GI is one of the country's top 10 accredited surgery centers for GI and weight-loss programs under his leadership.

During all these years, Dr. Bhatti developed his team of GI doctors, PAs, and surgeons to keep his one-week promise for a full scope of GI and weight-loss procedures. Dr. Bhatti is managing an in-house anesthesia team supervised by the anesthesiologist to provide the best outpatient experience for patients. As a visionary and passionate doctor commit-

ted to the mission, he is increasing the outreach by opening another state-of-the-art GI and weight-loss surgery center in Edina in Fall 2023.

Dr. Bhatti's team specializes in the diagnosis and treatment of GI disorders. He partnered with two board-certified gastroenterologists, and they all have expertise in all types of digestive conditions, such as acid reflux disease, heartburn, swallowing disorders, Crohn's disease and ulcerative colitis, hepatitis and liver disease, infusion therapy, celiac disease, and pancreatic disorders, as well as chest and abdomen cancer diagnosis and staging.

Dr. Bhatti performs a full scope of GI procedures throughout the week at Bhatti Surgery Center, including endoscopy, colonoscopy (with GI Genius technology), bravo reflux testing, sigmoidos-

copy, ERCP (Endoscopic Retrograde Cholangiopancreatography), EUS (Endoscopic Ultrasound), GI cancer staging, liver biopsy, pancreatic biopsy, and more. While the usual wait time is four to eight weeks—if not more—to see a GI specialist, Dr. Bhatti provides first-class GI care without the wait.
